

RC DUSTER'S TAILSPIN

Volume 5, Issue 7

July 2008

From the Office of the R/C Dusters – June

For all of those that find an interesting article or come across any websites while surfing the net, pass them along to me and I will put them in the newsletter or provide a link to the website. Email me rcdustersnewsdesk@yahoo.com.

For all those are heading up North to Oshkosh, you will be delighted to know that ...

For the first time, the V-22 "Osprey," one of the most unique aircraft flown by the U.S. military, will be making an appearance at EAA Air Venture and showcasing its unique flying abilities at "The World's Greatest Aviation Celebration." EAA Air Venture 2008 is July 28-August 3 at Wittman Regional Airport in Oshkosh.

The V-22, developed jointly by Bell and Boeing, is the world's first production tilt rotor aircraft. It is flown primarily by the U.S. Marine Corps and is designed to serve effectively on missions that had been covered by either helicopters or twin turboprop aircraft. The two Ospreys are scheduled to arrive at EAA Air Venture on Monday, July 28, during the event's opening-day air show, and remain until Friday, August 1.

For those that want to check out the full story and see the schedule, here is the link to the website.

CLUB MEETING
FLYING FIELD
JULY 9TH 7:00 PM
DON'T BE LATE!!!

Minutes from June

June 2008 meeting of the RC Dusters held June 11th at the field. Meeting called to order at 7:15 by President Lee Ernest. The Secretary report given. Motion to accept-- Steve Baker. Second-- Deane Goldstein. The Treasurer's report given by president Lee Ernest since the treasurer was absent.

Correspondence—

We have received a invitation and some flyers from IVRC for their fun-fly which will be held Sat. and Sun June 28th and 29th. It was noted the Dusters fun-fly is set for Sunday, June 22nd. Gerry will be chief cook. Lee suggested that we do not use Doug's canopies due to the work involved in setting them up and down. Gerry felt that at least on for a food tent would be good.

It was noted the rock pick up at the new field was held and probably at least two tons of rocks have been picked up. The new field has been over seeded, rolled, and mowed. Steve suggested we have another pick up. Lee brought up whether to have a road pick up at the old field. It was suggested to wait and see if the state mows the ditches or not. The subject of another rock pick up brought up again. Sunday, July 13th set as the date.

Steve noted that he had been sick and hadn't got anything done on the shirts and caps to be ordered. He will check on jackets also. No more business brought up.

RC DUSTER'S TAILSPIN 1

Fun Fact – Air Force One

The most remarkable feature on the plane is it's extensive electronics. It has 85 onboard telephones, a collection of two-way radios, fax machines and computer connections. It also has 19 televisions and assorted office equipment.

The phone system is set up for normal air to ground connections and secure lines.

Minutes Con't.

Show & tell:

Kevin Scott brought an E-Flight "Mini Pulse XT" and a Rich Models Zero electric ARF.

Steve noted that the new house north of the field has been staked out. Work will probably start on it soon.

Meeting adjourned at 7:35.

Respectfully submitted,
Dave Erlenbach -Sec.
